

Galaxy Introduces the Very First 'Fort Knox' Slot Machine Chain into Macau

First introduction at the Grand Waldo Casino

Now tremendous gaming variety available to players

Jul 17, 2006

(17 July, 2006- Macau) - Galaxy Casino S.A. ('Galaxy'), a subsidiary of the Galaxy Entertainment Group Limited (Stock Exchange Code: 27), is committed to offering the latest in entertainment facilities to the public. Introducing a high-excitement experience from among the best the gaming entertainment industry has to offer, Galaxy recently installed the very first 'Fort Knox' slot machine chain in Macau at the Grand Waldo Casino. With up to 24 linked slot machines offering mystery platinum jackpots with a minimum of HK\$100,000, this innovative system is bound to trigger a new sensation in the Macau gaming world.

The 'Fort Knox' slot allows four progressive jackpot levels with no ceiling, which means the more players on the machines, the more each jackpot accumulation grows and the more players can win. The jackpot continues to accumulate until a player wins. The 'Fort Knox' Mystery Progressives are displayed on the LCD monitors in the signs above the machines and in the upper screen on the slot machines themselves.

The Mystery Progressive Jackpot sets itself apart from the competition by offering one of the highest jackpots available, with a progressive that pays out a lot more frequently. With a minimum bet of HK\$0.20 per credit, and 1 credit for 1 line, the highest level being Platinum, engaging the player to start at HK\$100,000, and allowing the winnings to increase with no ceiling. Players can also multiply their chances of winning the mystery jackpot by placing more lines. An additional fun feature offered by Platinum-level gaming is more progressive than regular slot machines, further increasing the odds of winning, and thereby generating major thrills and excitement.

The starting jackpot amount for the Grand Waldo linked products plus all Mystery Link Jackpots will add up to at least HK\$2,000,000.

Mr. Ciaran Carruthers, Senior Vice President, City Clubs of Galaxy, said, "Galaxy's commitment is to offer the best entertainment facilities and services to customers and to develop Macau's entertainment industry as the leading entertainment and tourist metropolis in Asia. Galaxy is the very first casino operator in Macau to introduce the new 'Fort Knox' slot machine chain to Macau, and this is tangible evidence that we aim to further enhance the local entertainment industry by providing more and more innovative entertainment facilities."

Mr. Carruthers continued, "As one of our four casinos in Macau, the recently opened Grand Waldo Casino now offers a huge range of games, providing visitors with the ultimate in excitement. With the introduction of the 'Fort Knox' slot machine chain, the total number of slot machines available in Grand Waldo Casino has increased to 334, offering the widest range of jackpots on the floor, with nine theme-linked jackpot machines, including the first linked jackpot machines with a 5-cent denomination-the lowest in Macau. The configuration promises an exciting and thrilling jackpot environment for all slot gaming aficionados."

A 'Fort Knox' promotion is scheduled from 17 July till the 13 August 2006. Visitors will see 'Fort Knox' signs and symbolic chocolate bricks prominently displayed throughout the Grand Waldo Casino. Explanatory leaflets will also be easily available to visitors, while promotion ladies in attractive costumes will be stationed inside the casino to greet players and explain the 'Fort Knox' mechanism on every Friday to Sunday, as well as provide players with special souvenirs.

The ultimate-experience 'Fort Knox' slot machine chain is now exclusively at the Grand Waldo Casino, and is destined to create a major new gaming trend in Macau.
